Today you are very fortunate as there is a major breakthrough, a discovery that is producing amazing results for people suffering with Chronic Pain (anywhere in the body, including fingers and feet), Fibromyalgia, Arthritis Pain, Numbness, Migraine Headaches, Forgetfulness, Burning, Insomnia, Fatigue, Irritability, Digestive Problems, Nervousness, Weakness and other Neurological Disorders.

Dr. Tashiro is one of the few Doctors in the country who has been trained in this new technique. The application of this technique is simple but the results are often profound -- and often, the more debilitating the condition, the more dramatic the results.

The focus of the procedure is the release of compression and tension in the Meninges -- the sheath that covers the brain, spinal cord and the roots of the nerves that carry vital nerve energy throughout the whole body.

One of the remarkable features of this technique is the "Test". It's gentle and non-invasive, involving the application of light pressure to the upper neck.
It takes less than 10 minutes, and if the actual treatment is going to help, the Test will often relieve symptoms for minutes, hours or even days.

The Neurologic Relief Centers Technique™ was first developed for the treatment of Fibromyalgia patients. As more and more Doctors have begun using the procedure, it’s been found to be effective not only for Fibromyalgia, but for many other debilitating neurological and chronic pain conditions.

On the NRCT™ website (www.nrc.md), you will find many remarkable video testimonials from people whose lives have been restored through NRCT™. Perhaps yours will be, as well!

Other symptoms which have been relieved with NRCT™:

* Tingling
* Muscle Spasms
* Nerve Pain
* Brain Fog
* Anxiety
* Memory Problems
* Visual Disturbances
* Intestinal Pain
* Depression
